INTRODUCTION

The delete operation removes selected parts and *any parts dependent on them*. All information associated with the parts on both the client and server is removed. Deletion cannot be undone.

BASIC OPERATION

1. Select the desired part(s) in the Parts List.

2. Select Edit > Part > Delete
   (or click the Delete icon of Part Mode, or click the Delete key on
   your keyboard while the mouse is in the graphics window).

3. Confirm the deletion.

OTHER NOTES

In some cases, variables that depend on a deleted part may have to be updated. For example, if you have a variable such as Area calculated on a set of parts and one of the parts is deleted, the Area variable will automatically be recalculated.

If you delete a grouped part, all parts in the group will be deleted.
